David Dinsmore
UI DESIGNER/DEVELOPER

Experience

UI Developer
TollFreeForwarding.com | October 2014 – Present

Responsible for developing the UI framework and front-end code standards for a white label web application. Worked with the Creative Services team to turn comps into a front-end component based framework. Wrote GulpJs build system to compile LESS into development and minified production CSS. Created a living style-guide for LESS variables and components built with MDCSS.

UX/UIDesigner
Gensuite LLC. | July 2013 – March 2014

Responsible for working directly with the product team on new application development. Collaborated daily with product managers and application leads to determine project requirements, user needs, and translated those needs into elegant interface designs.

- Built rapid prototypes to test various aspects of the design concept.
- Translated design concepts into functional web applications using clean, production ready mark up in HTML/ CSS/ Sass.

Interactive Designer
Global Cloud Ltd. | August 2008 – July 2013

Led a small team of designers and front end developers in the custom Content Management System division of Global Cloud. I was responsible for designing and maintaining client websites using both an in house ColdFusion based CMS as well as Mura CMS. While at Global Cloud I worked on a wide range of custom websites including intranets, extranets, as well as E-commerce.

Technical Expertise

Design	Development
Information Architecture	Valid HTML5/ CSS3/ LESS
Sketching/ Wire-framing	Rapid Prototyping
Typography	Gulp/ MDCSS
Responsive Design	Cross-Browser Debugging
